

NIKOLAS WEINSTEIN GLASS

“My sculptures are organic ‘echoes’ of the built environment rendered in glass. I imagine the installations in conversation with the architecture; sympathetic to its geometries but also acting as transparent, luminous counterpoints. In this way, my work talks to a client’s building. Not someone else’s building, not a type of building, but their building.”

Since 1991, Nikolas Weinstein has been exploring a sustained interest in creating large-scale glass Artworks that lie at the intersection of art and architecture. In this pursuit, Mr. Weinstein's commitment to innovation and craftsmanship allows the studio to build highly technical works without precedent, which can be seen in properties by premier architects and developers including the offices of Frank O. Gehry, Foster + Partners, and Swire Properties. The one-of-a-kind sculptures respond to architectural spaces by contrasting and integrating with their surroundings and range in scale from small and intimate to large works that define the character of an entire space. He and his team handle every aspect of a project; from design and fabrication, to shipping and installation.
